

On May 15<sup>th</sup> 2009 a budget was agreed upon for future major equipment purchases for the mine Las Palmeras #4395. A Sullair 185 compressor will be leased including Air Hammers and Drills with an option to buy after the first month of production.

The Gold and Silver bearing ore will be processed with the equipment shown in pictures below. With major electric and the only fresh water source within three surrounding mine concessions, the Gold and Silver ore processing plant at Las Palmeras will be a profit center for many years too come!

The companyMona Minas S.A. plans to acquire the surrounding mine concession sites once Las Palmeras is producing to increase the lifespan of the processing plants reserves and the company assets.

**MONA MINAS S.A. MINING EQUIPMENT TO BE PURCHASED  
FROM MAY 2009 TO JULY 2009**

**COMPRESSOR AND HOSES FOR PNEUMATIC DRILLS AND HAMMERS TO WORK INSIDE THE  
MINE**

LAB CRUSHERS

**ORE PROCESSING EQUIPMENT THAT WILL ALLOW UP TO 14 TONS OF ORE TO BE PROCESSED DAILY**

ONCE THE ORE HAS BEEN GROUND, MILLED AND SHAKEN TO A FINE POWDER IT WILL THEN BE PROCESSED USING CYANIZATION TECHNIQUES IN LARGE TANKS SIMILAR TO THOSE PICTURED BELOW!
