Diapositiva 3

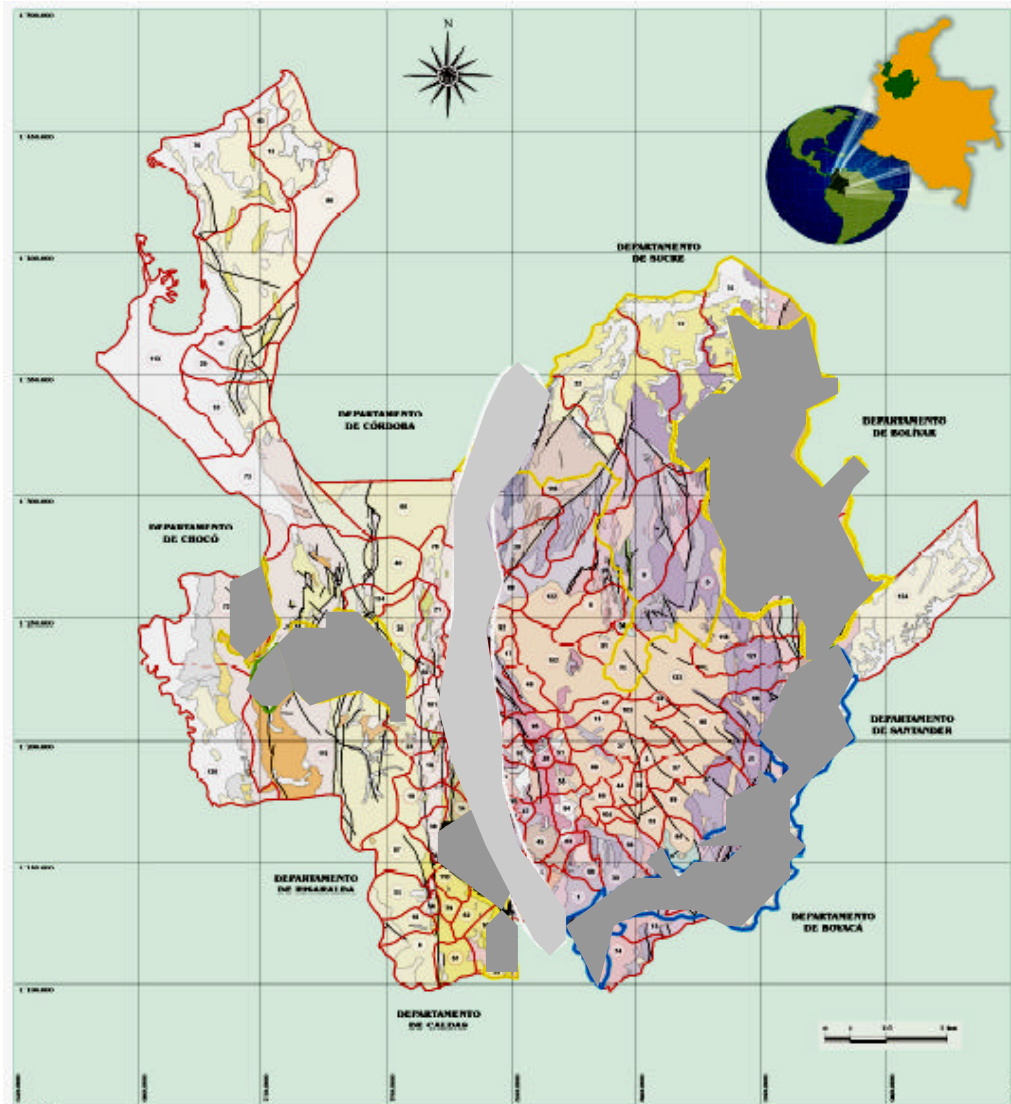

RCV6 22% of what? This percentage should be explained or not used at all.
Cam Vidler, 25/02/2007

RCV7 Is 10.3 million oz accurate? In 2005 alone? Doesn't that mean billions of dollars in revenue? It sounds a little high compared to the 49,000 86,000 and 25,000 oz of the other gold miners.

RCV3

Is "6000 million tons" accurate? It sounds like a big number. If it is right though, it should be written as "6 billion tons."

Cam Vidler, 25/02/2007

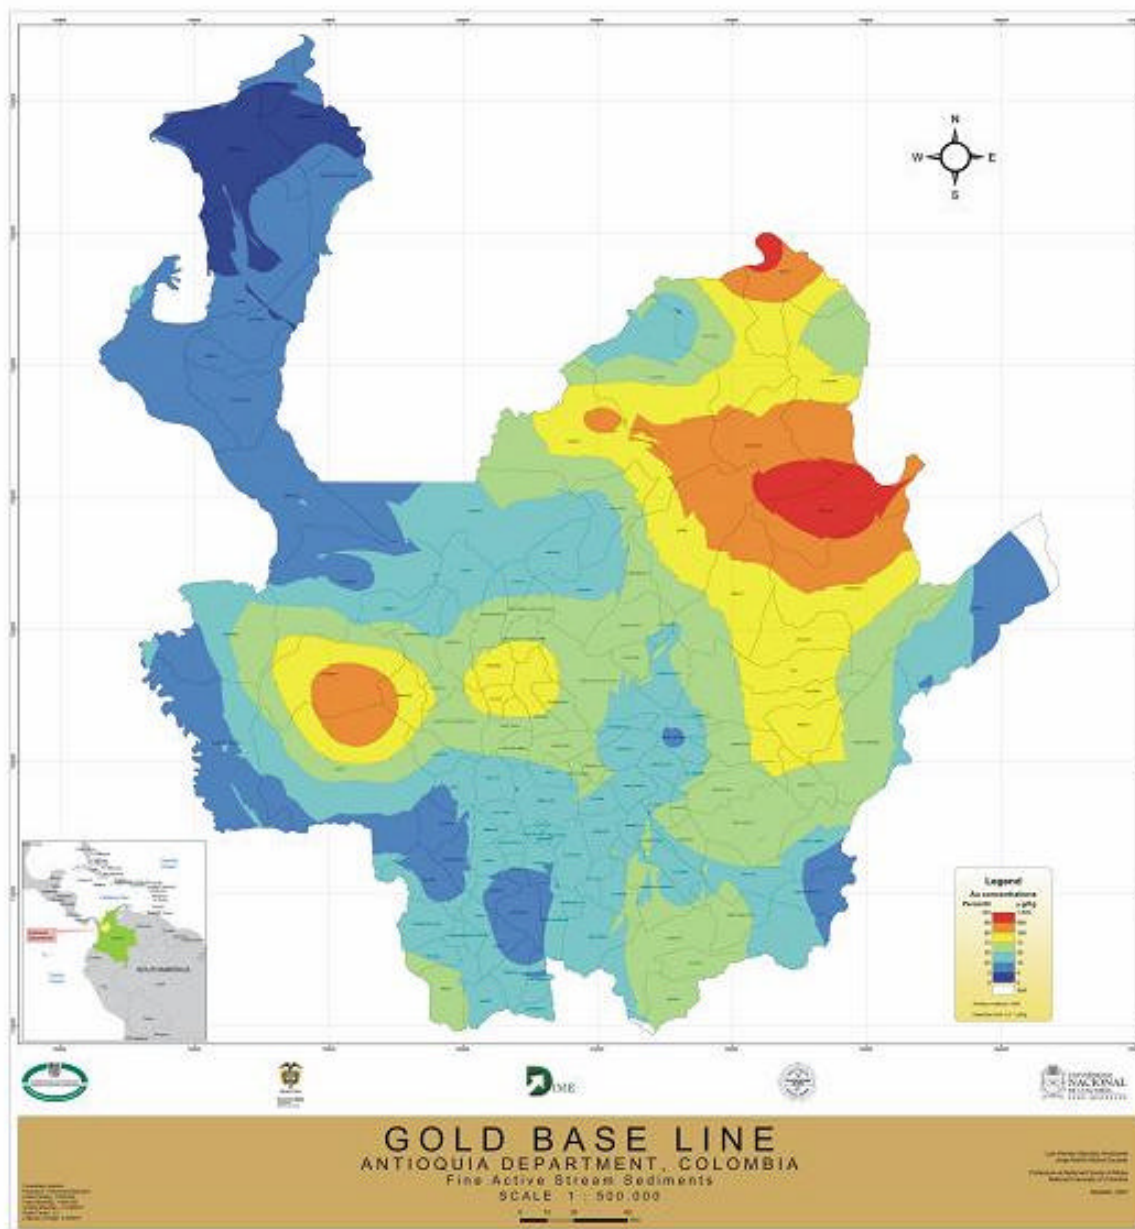

RCV4

I've bolded the numbers of tons. In the interest of being consistent, is there any way to get the numbers for Nickel from Cauca Ophiolites Belth?
